

## GOVERNMENT COLLEGE MOKERI, KOZHIKODE

### Employer Feedback Analysis

Given its rural location, Government College Mokeri is not situated in a region with abundant industrial or urban employment opportunities. Consequently, the primary employers of the college's graduates tend to be nearby educational institutions, such as schools and colleges. Feedback from these employers regarding the employability, work quality, and dedication of Government College Mokeri's graduates has consistently been positive. The college systematically collects offline feedback from the Institutional Quality Assurance Cell (IQAC) of colleges or the administrative offices of the schools where the graduates are employed. This feedback is gathered through concise, quality-focused questionnaires designed to assess the graduates' performance.

A significant number of alumni have found employment with Local Self Governing Bodies, NGOS, and the Postal Department. The college has obtained offline feedback from these institutions also. Additionally, several graduates have secured positions with the Devaswom (Temple Revenue Department) and Kerala Feeds. These feedback reports have also come out as positive. Those who are employed by PSC have completed their probation period without any disciplinary action or way-blocks, indicating that their services were also in keeping with the employers' expectations.

#### *Sample:*
